*Lucas-Sierpiński and Lucas-Riesel numbers*,  
Fibonacci Quart. **49** (2011), no. 4, 334–339.

**Abstract**

In this paper, we show that there are infinitely many Sierpiński numbers in the sequence of Lucas numbers. We also show that there are infinitely many Riesel numbers in the sequence of Lucas numbers. Finally, we show that there are infinitely many Lucas numbers that are not a sum of two prime powers.
