

The Fibonacci Quarterly

THE OFFICIAL JOURNAL OF THE FIBONACCI ASSOCIATION

TABLE OF CONTENTS

A Metric Result Concerning the Approximation of Real Numbers by Continued Fractions	<i>C. Elsner</i>	290
Identities for a Class of Sums Involving Horadam's Generalized Numbers $\{W_n\}$	<i>N. Gauthier</i>	295
A Note on Initial Digits of Recurrence Sequences	<i>Siniša Slijepčević</i>	305
Seventh International Conference Proceedings		308
A Chaotic Extension of the $3x + 1$ Function to $\mathbf{Z}_2[i]$	<i>John A. Joseph</i>	309
Wilson's Theorem via Eulerian Numbers	<i>Neville Robbins</i>	317
A Note on the Set of Almost-Isosceles Right-Angled Triangles	<i>M.A. Nyblom</i>	319
Mean Crowds and Pythagorean Triples	<i>Joseph R. Siler</i>	323
Generalizations of Some Identities Involving Generalized Second-Order Integer Sequences	<i>Zhizheng Zhang and Maixue Liu</i>	327
Some Identities Involving Generalized Genocchi Polynomials and Generalized Fibonacci-Lucas Sequences	<i>Zhizheng Zhang and Jingyu Jin</i>	329
The Diophantine Equations $x^2 - k = T_n(a^2 \pm 1)$	<i>Gheorghe Udrea</i>	335
A Generalization of the Kummer Identity and Its Application to Fibonacci-Lucas Sequences	<i>Xinrong Ma</i>	339
Author and Title Index		347
Some Extensions of Properties of the Sequence of Reciprocal Fibonacci Polynomials	<i>I. Jaroszewski and A.K. Kwaśniewski</i>	348
Complete Partitions	<i>SeungKyung Park</i>	354
Pseudoprimes, Perfect Numbers, and a Problem of Lehmer	<i>W. Carlip, Eliot Jacobson and Lawrence Somer</i>	361
A Toast to Our Editor		372
Elementary Problems and Solutions	<i>Edited by Stanley Rabinowitz</i>	373
Advanced Problems and Solutions	<i>Edited by Raymond E. Whitney</i>	379

VOLUME 36

AUGUST 1998

NUMBER 4

PURPOSE

The primary function of **THE FIBONACCI QUARTERLY** is to serve as a focal point for widespread interest in the Fibonacci and related numbers, especially with respect to new results, research proposals, challenging problems, and innovative proofs of old ideas.

EDITORIAL POLICY

THE FIBONACCI QUARTERLY seeks articles that are intelligible yet stimulating to its readers, most of whom are university teachers and students. These articles should be lively and well motivated, with new ideas that develop enthusiasm for number sequences or the exploration of number facts. Illustrations and tables should be wisely used to clarify the ideas of the manuscript. Unanswered questions are encouraged, and a complete list of references is absolutely necessary.

SUBMITTING AN ARTICLE

Articles should be submitted using the format of articles in any current issues of **THE FIBONACCI QUARTERLY**. They should be typewritten or reproduced typewritten copies, that are clearly readable, double spaced with wide margins and on only one side of the paper. The full name and address of the author must appear at the beginning of the paper directly under the title. Illustrations should be carefully drawn in India ink on separate sheets of bond paper or vellum, approximately twice the size they are to appear in print. Since the Fibonacci Association has adopted $F_1 = F_2 = 1$, $F_n + 1 = F_n + F_{n-1}$, $n \geq 2$ and $L_1 = 1$, $L_2 = 3$, $L_{n+1} = L_n + L_{n-1}$, $n \geq 2$ as the standard definitions for The Fibonacci and Lucas sequences, these definitions *should not* be a part of future papers. However, the notations *must* be used. One to three *complete* A.M.S. classification numbers *must* be given directly after references or on the bottom of the last page. **Papers not satisfying all of these criteria will be returned.** See the new worldwide web page at:

<http://www.sdstate.edu/~wscs/http/fibhome.html>

for additional instructions.

Two copies of the manuscript should be submitted to: **CURTIS COOPER, DEPARTMENT OF MATHEMATICS AND COMPUTER SCIENCE, CENTRAL MISSOURI STATE UNIVERSITY, WARRENSBURG, MO 64093-5045.**

Authors are encouraged to keep a copy of their manuscripts for their own files as protection against loss. The editor will give immediate acknowledgment of all manuscripts received.

The journal will now accept articles via electronic services. However, electronic manuscripts must be submitted using the typesetting mathematical wordprocessor AMS-TeX. Submitting manuscripts using AMS-TeX will speed up the refereeing process. AMS-TeX can be downloaded from the internet via the homepage of the American Mathematical Society.

SUBSCRIPTIONS, ADDRESS CHANGE, AND REPRINT INFORMATION

Address all subscription correspondence, including notification of address change, to: **PATTY SOLSAA, SUBSCRIPTIONS MANAGER, THE FIBONACCI ASSOCIATION, P.O. BOX 320, AURORA, SD 57002-0320.**

Requests for reprint permission should be directed to the editor. However, general permission is granted to members of The Fibonacci Association for noncommercial reproduction of a limited quantity of individual articles (in whole or in part) provided complete reference is made to the source.

Annual domestic Fibonacci Association membership dues, which include a subscription to **THE FIBONACCI QUARTERLY**, are \$37 for Regular Membership, \$42 for Library, \$47 for Sustaining Membership, and \$74 for Institutional Membership; foreign rates, which are based on international mailing rates, are somewhat higher than domestic rates; please write for details. **THE FIBONACCI QUARTERLY** is published each February, May, August and November.

All back issues of **THE FIBONACCI QUARTERLY** are available in microfilm or hard copy format from **UNIVERSITY MICROFILMS INTERNATIONAL, 300 NORTH ZEEB ROAD, DEPT. P.R., ANN ARBOR, MI 48106.** Reprints can also be purchased from **UMI CLEARING HOUSE** at the same address.
