

# Contents

Jean-Paul Allouche	
<i>Some Extremalities of the Binary Fibonacci Sequence</i> . . . . .	1
Peter G. Anderson	
<i>Notes &amp; Extensions for a Remarkable Continued Fraction</i> . . . . .	9
Christian Ballot, Clark Kimberling, and Peter J. C. Moses	
<i>Linear Recurrences Originating From Polynomial Trees</i> . . . . .	15
Arthur T. Benjamin and Joel Ornstein	
<i>A Bijective Proof of a Derangement Recurrence</i> . . . . .	28
Bruce M. Boman	
<i>Why do Fibonacci Numbers Appear in Patterns of Growth in Nature?</i> . . . . .	30
Christopher Brown	
<i>The Natural Logarithm of the Golden Section</i> . . . . .	42
Zvonko Cerin	
<i>On Candido Like Identities</i> . . . . .	45
Curtis Cooper, Steven Miller, Peter J. C. Moses, Murat Sahin, and Thotsaporn Thanatipanonda	
<i>On Identities of Ruggles, Horadam, Howard, and Young</i> . . . . .	52
Paul Cull	
<i>What I Tell You <math>K</math> Times is True ...</i> . . . . .	66
Russell Jay Hendel	
<i>Proof and Generalization of the Cassini-Catalan-Tagiuri-Gould identities</i> . . . . .	76
Virginia P. Johnson and Charles K. Cook	
<i>Areas of Triangles and Other Polygons with Vertices from Various Sequences</i> . . . . .	86

Tamás Lengyel	
<i>On the Rate of <math>p</math>-adic Convergence of Alternating Sums of Powers of Binomial Coefficients . . . . .</i>	96
Ray Li and Steven J. Miller	
<i>A Collection of Central Limit Type Results in Generalized Zeckendorf Decompositions . . . . .</i>	105
Frédéric Mansuy	
<i>Fibonacci words and the construction of a “Quasicrystalline” Fivefold Structure . . . . .</i>	115
Steven J. Miller, Dawn Nelson, Zhao Pan, and Huanzhong Xu	
<i>On the Asymptotic Behavior of Variance of PLRS Decompositions . . . . .</i>	135
Augustine O. Munagi	
<i>Two Applications of the Bijection on Fibonacci Set Partitions</i>	144
Claudio Pita Ruiz	
<i>Weighted Sums of Squares via Generalized Eulerian Polynomials</i>	149
Gabriela N. Stănică and Pantelimon Stănică	
<i>Recurrences for Entries of Powers of Matrices . . . . .</i>	166
Paul K. Stockmeyer	
<i>An Exploration of Sequence A000975 . . . . .</i>	174
Tamás Szakács	
<i><math>k</math>-Order Linear Recursive Sequences and the Golden Ratio . . . . .</i>	186
Mohammed Taous	
<i>On the 2-Class Group of <math>\mathbb{Q}(\sqrt{5pF_p})</math> Where <math>F_p</math> is a Prime Fibonacci Number . . . . .</i>	192
Paul Thomas Young	
<i>Congruences for Bernoulli - Lucas Sums . . . . .</i>	201
Clark Kimberling	
<i>Problem Proposals . . . . .</i>	213
